

Magnetic Moments in Central Europe 2015

February 25th-March 1st,
Krynica-Zdrój, Poland

The conference Magnetic Moments in Central Europe (MMCE) was conceived in 2007 with the vision of providing a unique knowledge-sharing event for NMR scientists and students in the region.

MMCE aims to address all walks of theoretical and applied NMR spectroscopy, ranging from fundamental theory through small-molecule structure determination, new pulse sequences, software and hardware development, etc. to biological molecules.

MMCE also accommodates the presentation of cutting-edge new results, with the speakers being encouraged to add some didactic flavor to their talks.

MMCE wishes to act as a dynamic NMR discussion forum in both an intellectual and social sense. Discussions are encouraged after each presentation, and to that end sufficient room is provided in the program. It aims to become a well-consolidated platform for building social capital in the NMR community of Central Europe and beyond.

MMCE is dedicated to involving many young scientists and university students as participants.

MMCE is held every second year in varying locations within Central Europe. It usually lasts for five days, starting Wednesday evening and ending Sunday noon. Topics are divided into sessions.

Speakers:

Zoltan Beni
Ivana Biljan
Bernhard Brutscher
Isabella Felli
Zofia Gdaniec
Christian Griesinger
Lars Hanson
Jozef Kowalewski
Katalin Kövér
Peter Lukavsky
Gregor Mali
Vladimir Mlynarik
Hartmut Oschkinat
Marek Potrzebowski
Harald Schwalbe
Svetlana Simova
Christina Thiele
Dusan Uhrin
Władysław Węglarz
Klaus Zangger

Organizing Committee

Wiktor Koźmiński
John Breslin
Robert Konrat
Tibor Liptaj
Predrag Novak
Janez Plavec
Jan Schraml
Jan Sykora
Csaba Szantay
Thomas Zellhofer

Early registration deadline:
December 15th 2014
